

Croplands Product Profile

CropPak 12-Volt

Croplands CropPak's are built tough for demanding conditions.

The recessed pump ensures it is well protected from both the elements and knocks that can occur when out in the field. Correct storage and handling is a must and this is ensured with large carry handles that can also be used to store the hose and a lid that allows attachment of the lance. Combine this with the reliability of the Flojet pump and you have a unit built to last.

FEATURES	BENEFITS
Cavity mounted pump	Superior protection against the elements and knocks
Semi-transparent tank	Tank level can be seen from outside the tank
Remote mounted switch	On/off switch can be mounted in most convenient location
Large carry handles	Easy handling, can also be used to store hose for neat storage
Lance clips onto lid	Ensures neat storage and ease of handling
UV stabilised tank	Prevents ageing and brittleness from sunlight
Large filling lid	Helps prevent spillage when filling
3 stage filtration	Prevents clogging of nozzle and ensures long pump life
All cabling supplied	All items supplied for direct mounting to 12 volt battery or power source.
