Nozzles for washing Containers

This product is used to clean chemical products out of emptied containers before they are disposed of. It consists of a central shaft on which rotates a fluid-activated nozzle that is able to rotate through 360° to spray the inner surfaces of the container. The nozzle has tips at its end which allows it to break the protective film on sealed containers holding chemical products. It is made using anticorrosive material. Versions: with 1/2" BSP male connector and 18x1.5 male connector.

FLOW (LIT/MIN.)	PRESSURE (BAR - PSI)
15.0	1.0 - 14
16.5	1.5 - 22
18.0	2.0 - 29
19.5	2.5 - 36
21.0	3.0 - 44
24.0	4.0 - 58
27.0	5.0 - 73
