

## **Croplands' range of TeeJet® products**

TeeJet® is a major supplier of spraying accessories & components to Croplands. Croplands is one of the largest stockists of TeeJet®'s range in Australasia, and uses a large portion of their range in the manufacture of spraying machinery, as well as supplying a network of resellers numbering several thousand throughout both New Zealand & Australia.

A brief overview of the range of products Croplands carries is set out below:

- A full selection of broadcast, banding, special application, turf, orchard & vine and liquid fertiliser nozzles
- Nozzle bodies, fittings, caps, seals, adaptors, clamps and other boom fittings
- Spray guns, pressure regulators, filters, spray lances and manual valves
- Electric spray controllers, auto-rate controllers, electric valves & components
- Technical catalogues & promotional material
- Spare parts for all Teejet®'s range

TeeJet® produce an excellent catalogue, [available for free from Croplands](#). They also have an extensive website, accessible at [www.teejet.com](http://www.teejet.com) which has all the information on their products & services.

We have included a few pages of technical information, taken directly from TeeJet®'s latest catalogue, on our website. These pages are in the TeeJet® folder & labelled as follows:

1. ***Broadcast Nozzle Selection Guide*** – a guide to using TeeJet®'s range of Broadcast nozzles
2. ***Specialty Application Nozzle Selection Guide*** – a guide to banding, directed spraying & mechanical air-assisted nozzles
3. ***Turfgrass Nozzle Selection Guide*** – a guide to turfgrass application nozzles
4. ***Liquid Fertiliser Nozzle Selection Guide*** – a guide to liquid fertiliser options
5. ***Droplet & Drift Information*** – BCPC classification in accordance with ASAE Standard S-572 for TeeJet® nozzles
6. ***Drift Causes & Control*** – information on drift and drift control
7. ***Spray Tip wear & Distribution Quality*** – a useful technical page outlining how to access spray tip wear and the distribution issues involved with spray tip wear
8. ***Technical Details*** – formulas, nozzle spacings and coverage information
9. ***Area Measurements*** – A step-by-step chart for broadcast or banding applications
10. ***Sprayer Calibration & Accessories*** – A step-by-step chart for broadcast or banding applications
